

The Porphyry

Dedication

To W. Martin Speare, Dr. Gerald U. Green, William W. Long, and Eugene C. Anderson, in recognition of their achievements as alumni of the School of Mines, their contributions to the prestige of the School as members of the faculty and staff, and their friendly and considered understanding of the problems of student life particular to this situation, this 1952 PORPHYRY is dedicated.

Left to Right:

WILLIAM MARTIN SPEARE: Librarian and Assistant Professor of Spanish. Graduate of Capitol College, Denver, 1930; B. S. General Science, New Mexico School of Mines, 1931; Graduate work in Library Science and Spanish, St. Louis University and Western State College, 1939, 1945; Member American Library Association; American Association of Teachers of Spanish; New Mexico Library Association; Sec.-Treasurer NMIMT Alumni Association.

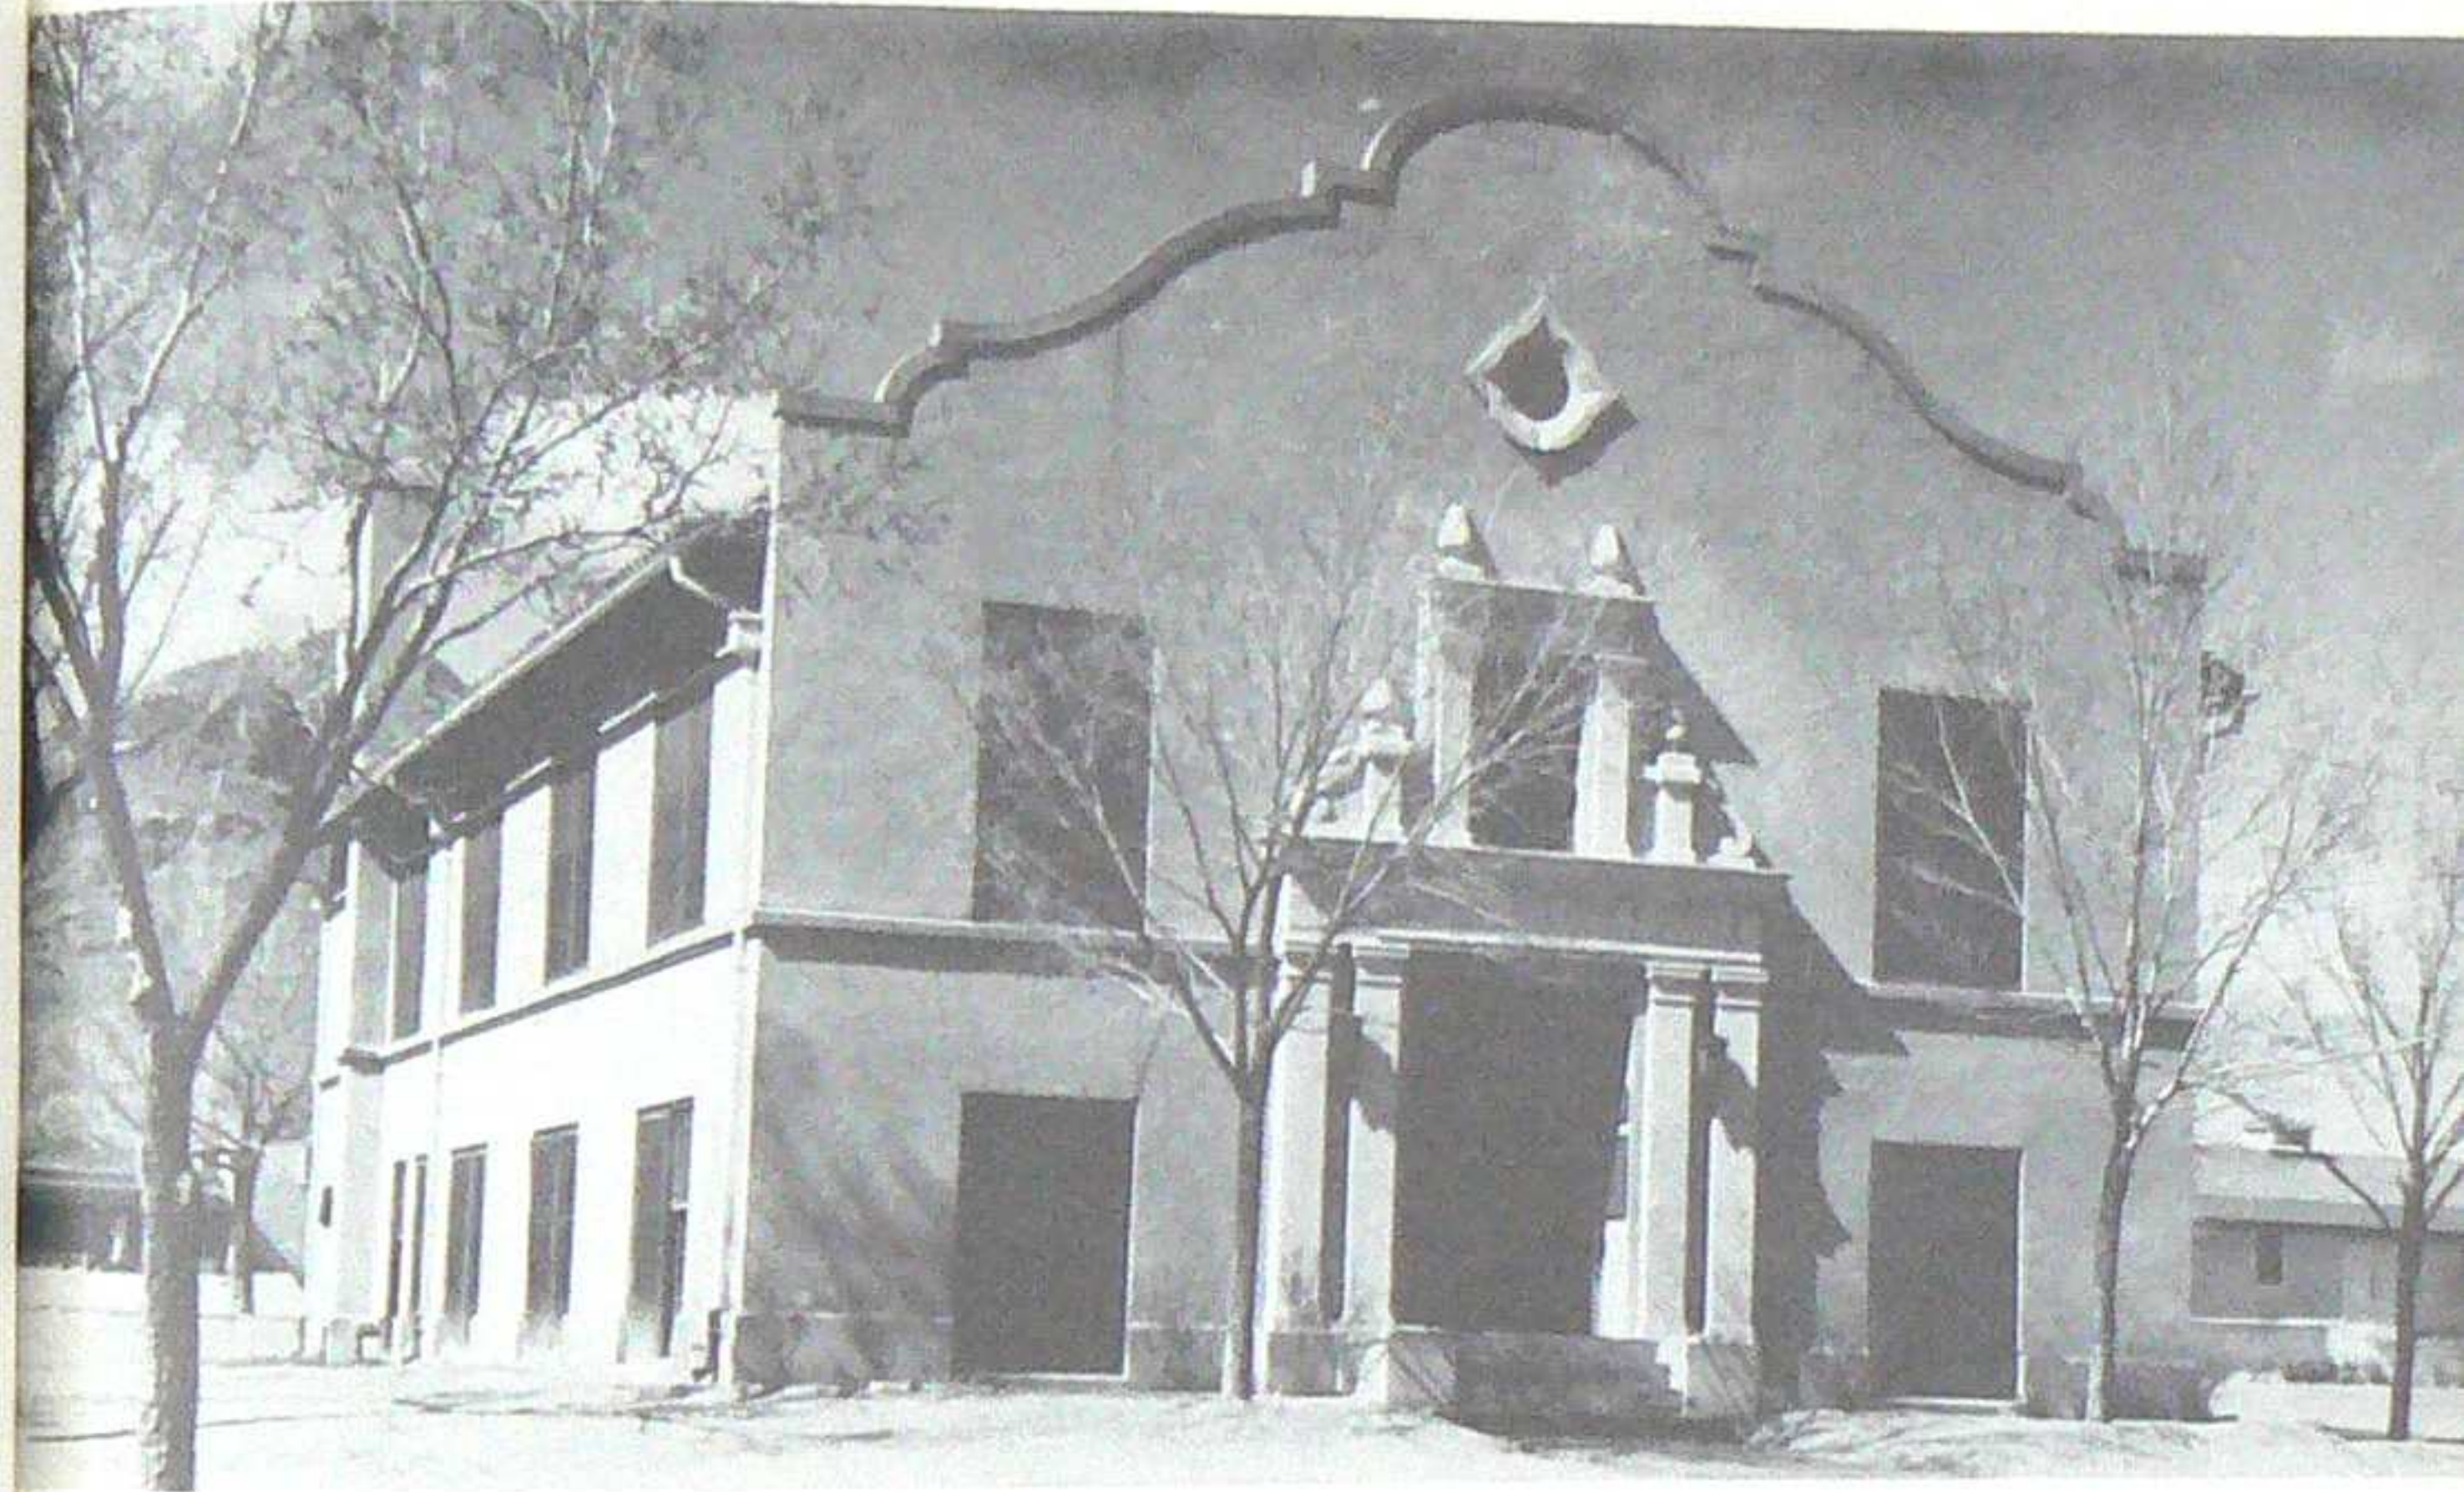

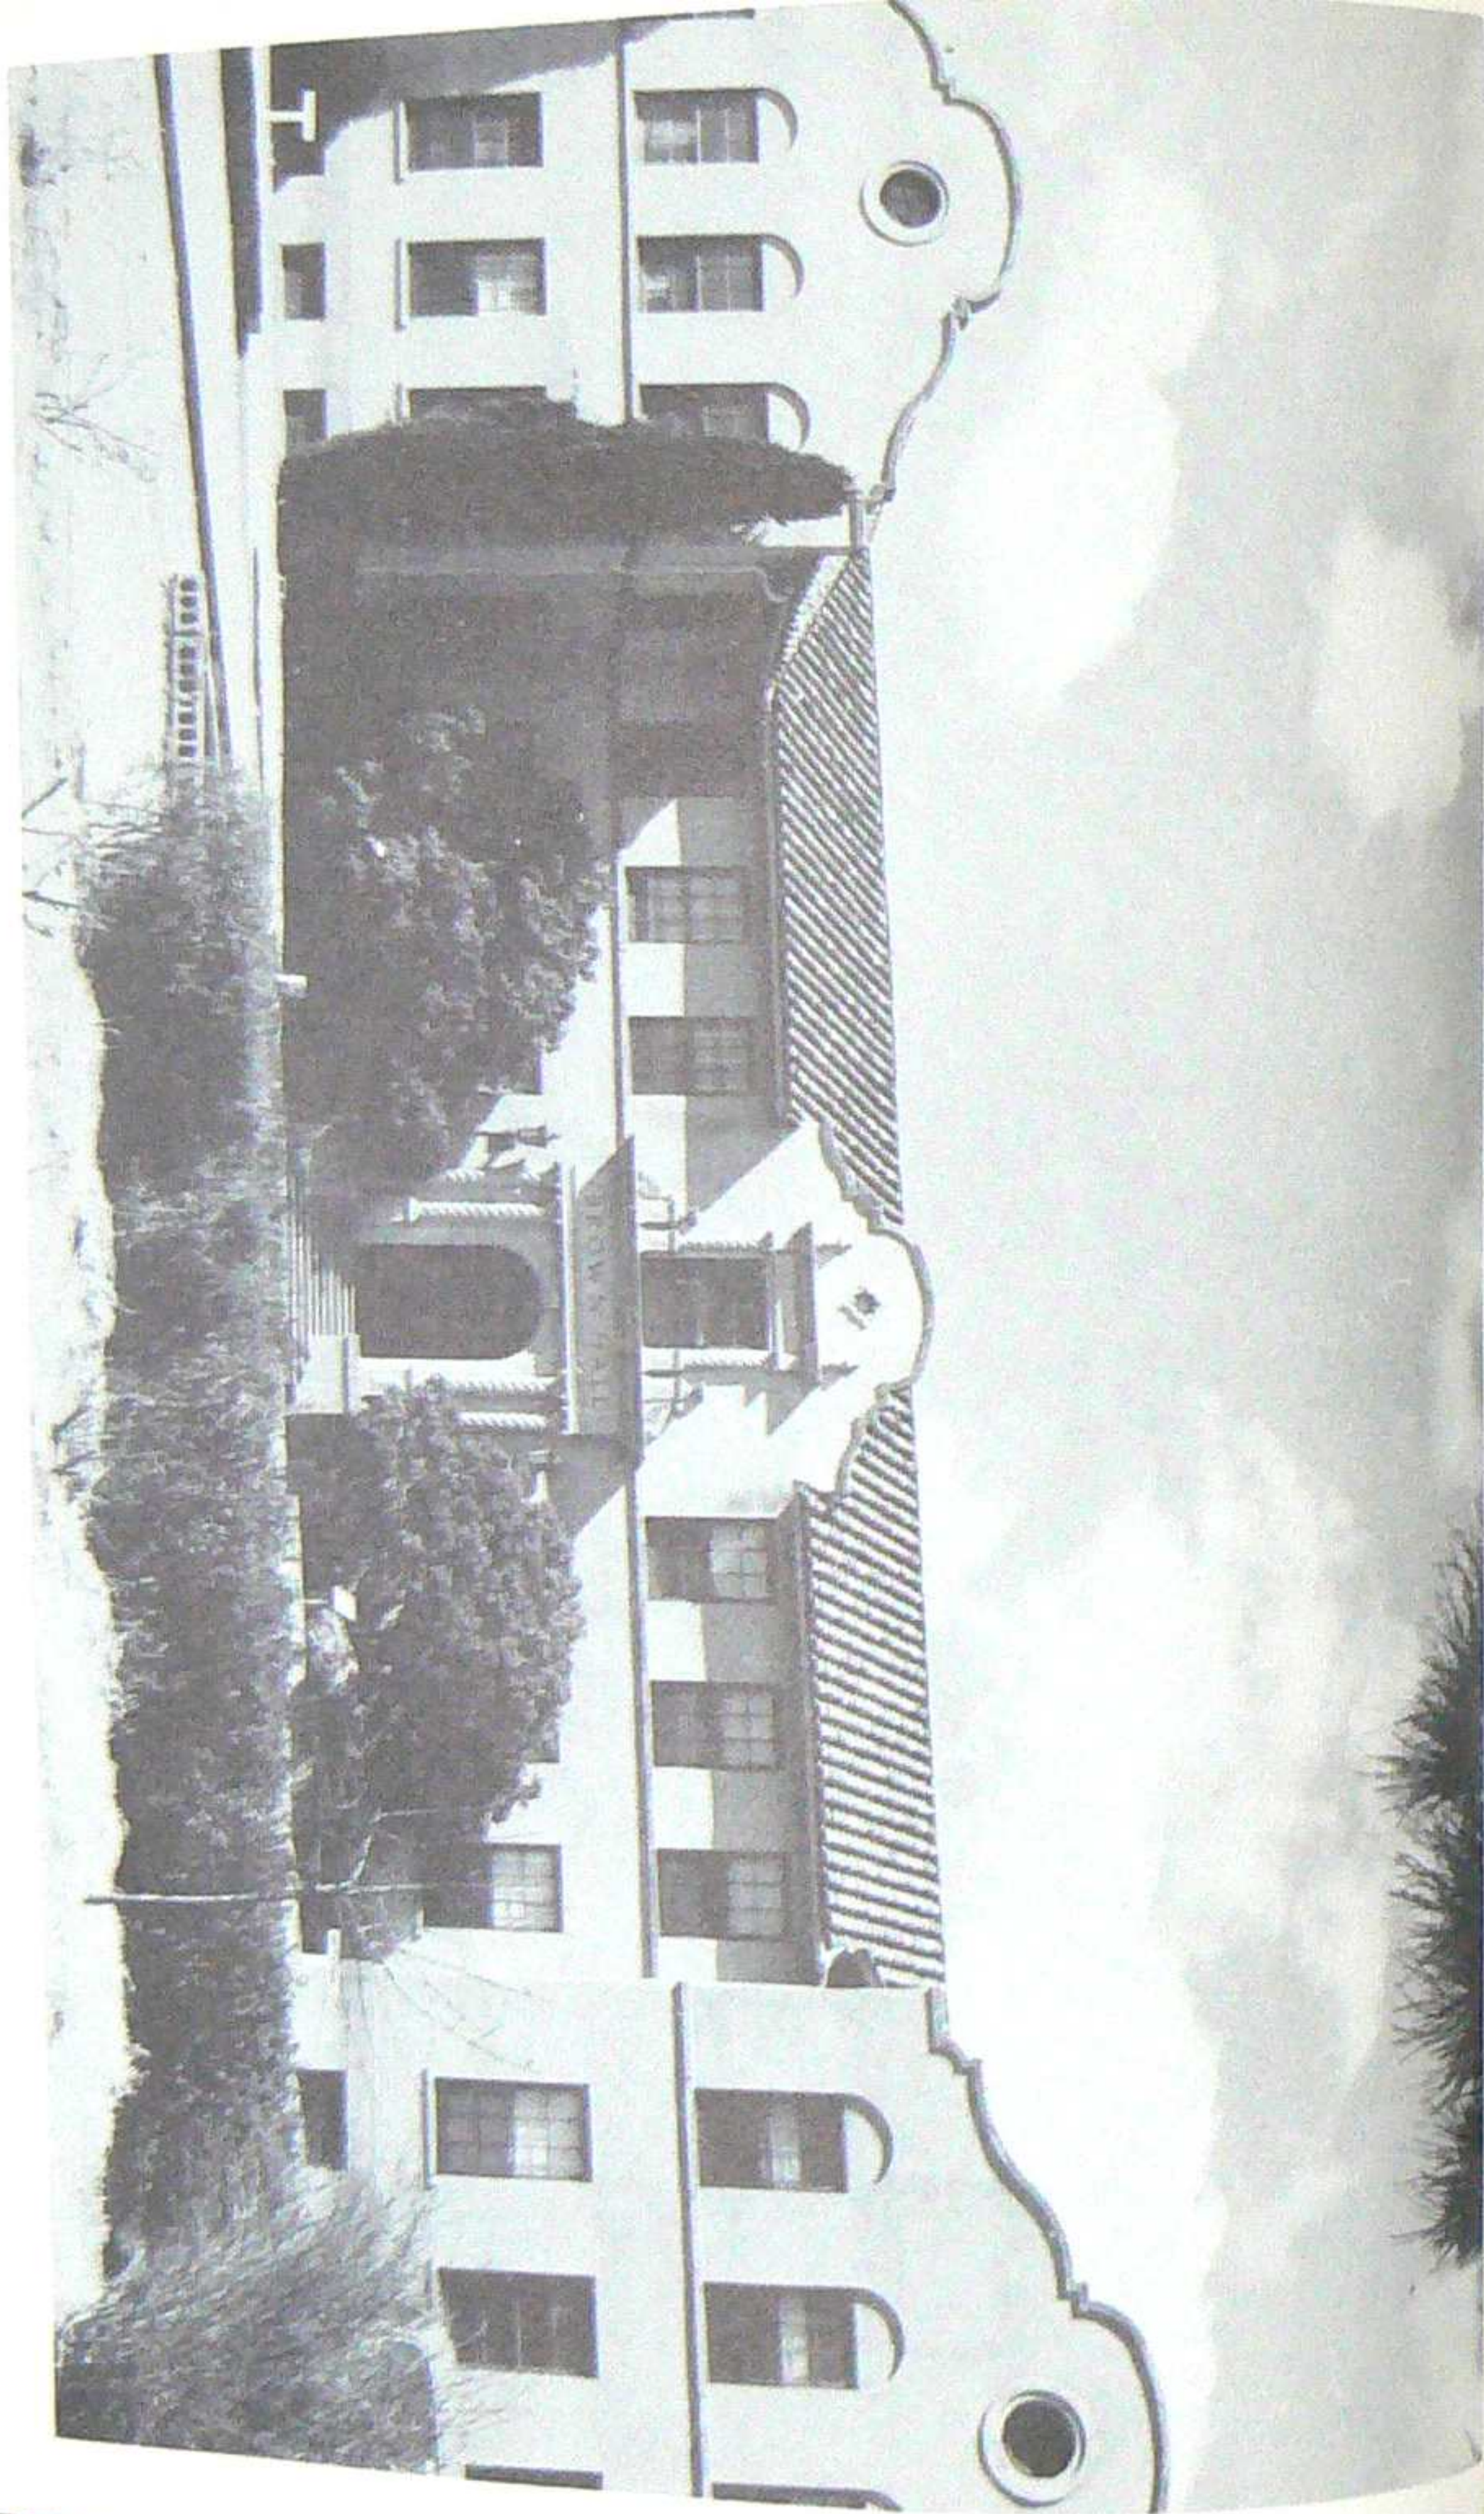

GERALD U. GREENE: Associate Professor of Metallurgy. B. S. General Science, New Mexico School of Mines, 1923; M. S. Metallurgy, University of Utah, 1924; D. Sc., Harvard University, 1934; Member American Institute of Mining and Metallurgical Engineers; American Society for Metals; Society for Non-Destructive Testing.

EUGENE C. ANDERSON: Supervisor of Mining Section of New Mexico State Bureau of Mines and Mineral Resources.

B. S. Civil Engineering, Mississippi State College, 1913; B. S. Mining, New Mexico School of Mines, 1917; C. E., New Mexico School of Mines, 1926; E. M. New Mexico School of Mines, 1938; Present Vice Chairman New Mexico State Economic Development Commission; New Mexico representative on Water and Mineral Resources Committee of, "Arkansas - White - Red - River Basin", investigations by U. S. Army Engineers and U. S. Bureau of Mines.

WILLIAM W. LONG: Assistant Professor of Mining Engineering. B. S. Engineering, U. S. Naval Academy, 1922; B. S. General Science, New Mexico School of Mines, 1926; Member American Institute of Mining and Metallurgical Engineers; Registered Engineer and Land Surveyor, New Mexico.

DR. E. J. WORKMAN
President

It is a pleasure to greet the students and their friends with each new issue of the Porphyry. In doing this I have an opportunity to assure our friends of continued progress and to thank the students for their contribution to the welfare of the college community.

E. J. Workman

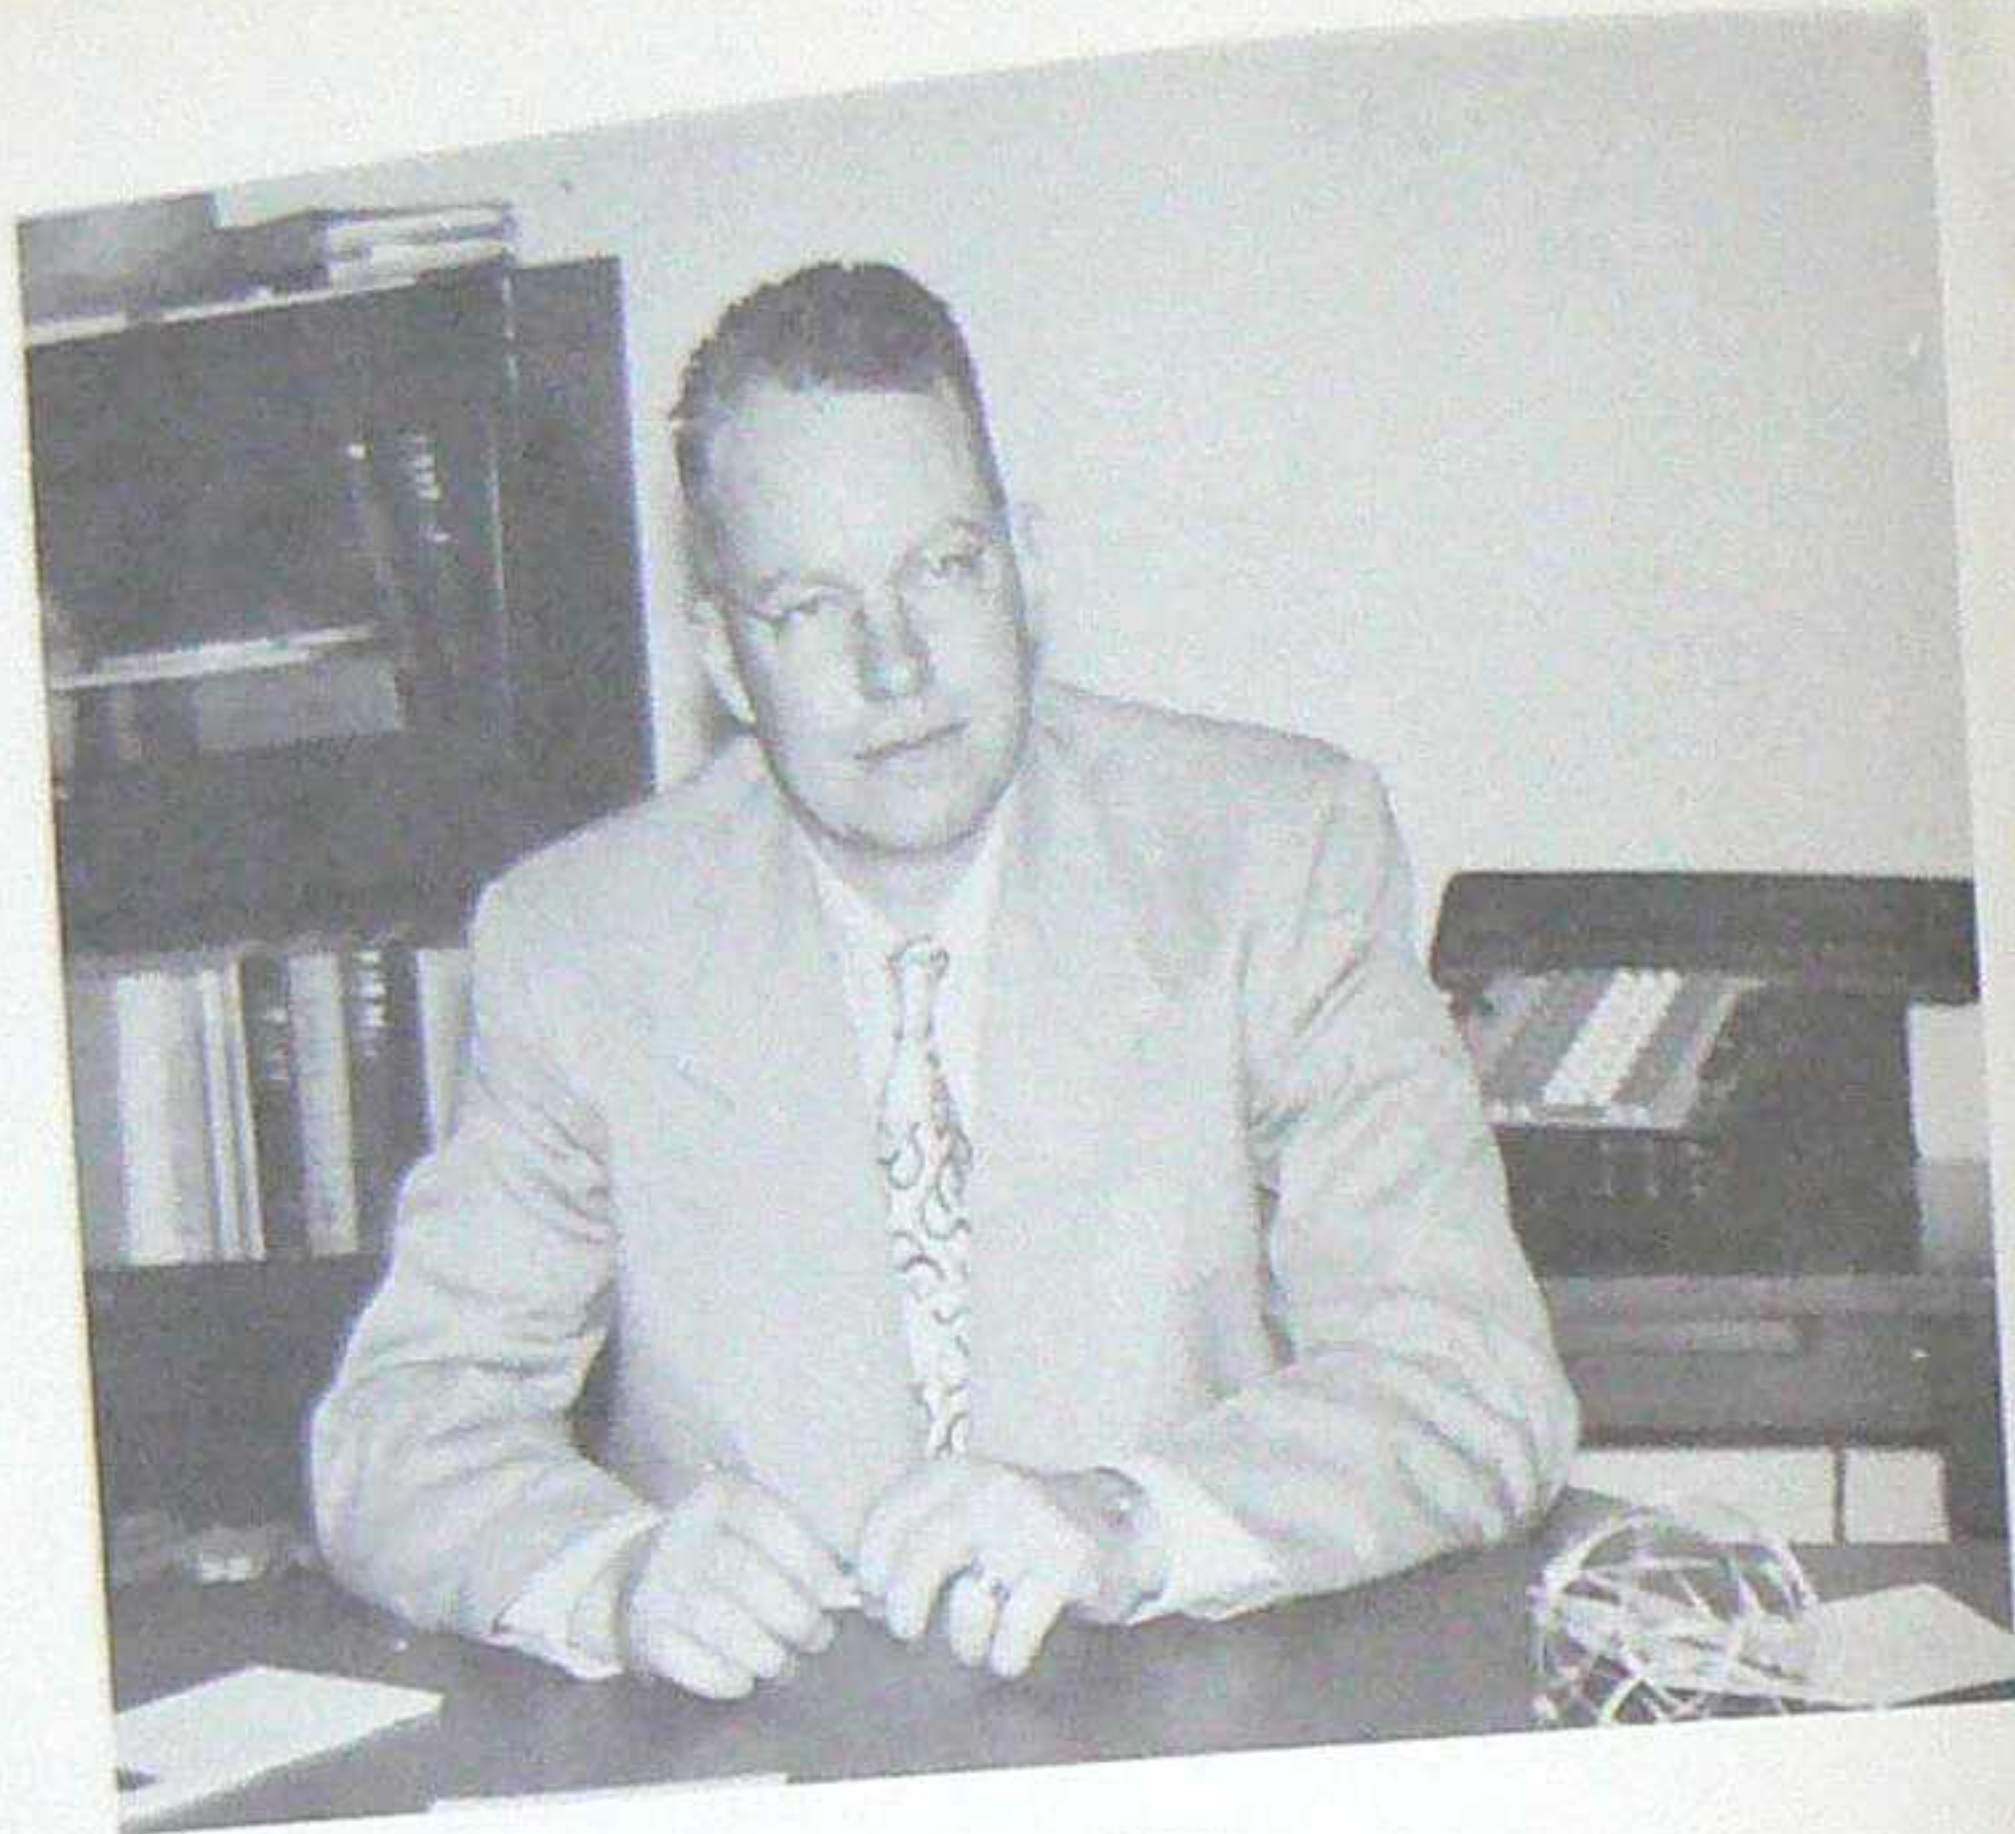

DR. WILLIAM HUME, II
Director of the College

An educational institution, like all living things, is continually changing. The physical features of the campus may be altered drastically in a comparatively short time; the student group undergoes a complete turnover every few years, and the faculty though more stable, is far from constant; and the underlying spirit of the institution also changes with the years as the influence of the personality and performance of new individuals becomes effective.

The Porphyry of 1952 attempts to present within its covers a true picture of the New Mexico Institute of Mining and Technology as it is at this particular period of its development. If it succeeds in this aim, it will be a real contribution to the recorded history of the institution, a book which in years to come will afford much pleasure to those whose doings it records.

We've Come A Long Way

between these two photographs. The time can be measured in new buildings and landscape gardening, but more important is the progress of the Institute as an educational entity.

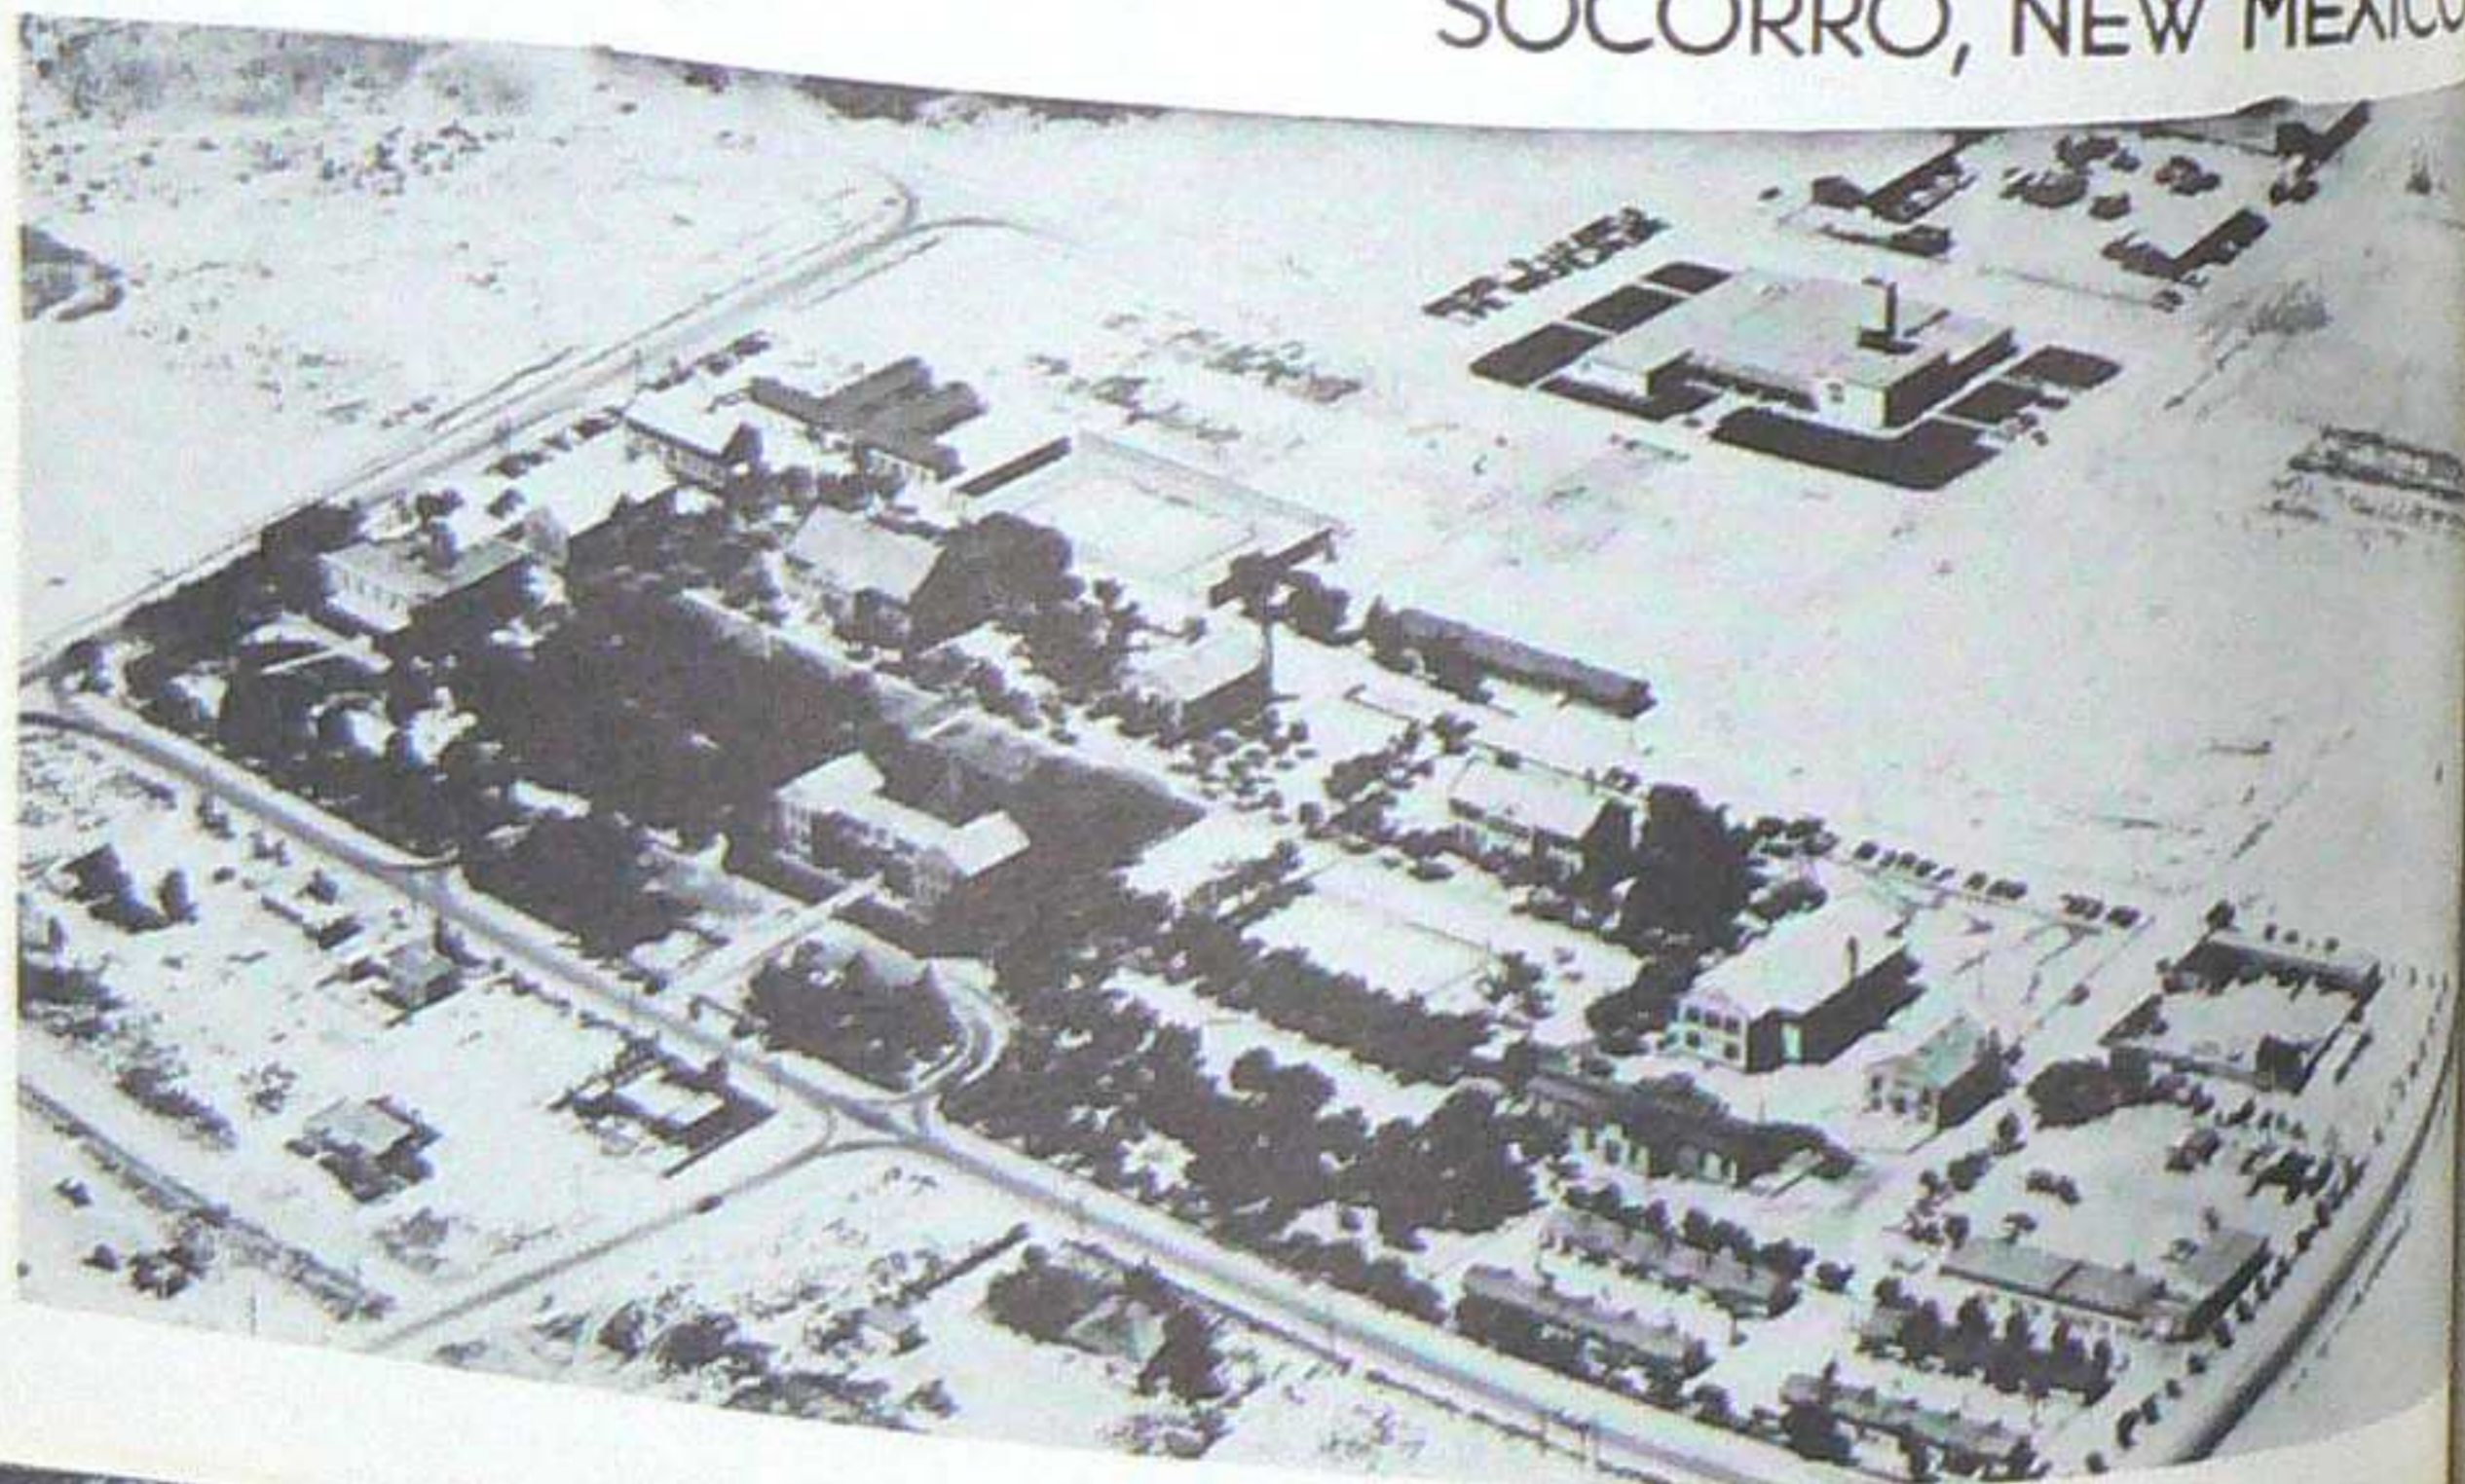

THE COLLEGE DIVISION offers the B. S. degree in Chemistry, Geology, Geophysics, Mathematics, Metallurgical Engineering, Mining Engineering, Petroleum Engineering, and Physics. The M. S. is granted in Geology, and Geophysics. THE STATE BUREAU OF MINES & MINERAL RESOURCES, with its staff of geologists and engineers, is a vital factor in the discovery and development of New Mexico's resources. THE RESEARCH & DEVELOPMENT DIVISION is known internationally for its contributions to scientific knowledge.

CAMPUS STATION

SOCORRO, NEW MEXICO

HE CAME FOR GOLD... and missed it.

Funny, isn't it . . . that the greatest of all "Conquistadores" considered his life a failure. That he rode thousands of miles on the strength of wild tales told him by Pecos Indians . . . conquered a vast empire for "the New Spain" and considered it nothing . . . because the gold he wanted so badly always eluded him.

It was ironic . . . because this man, Francisco Coronado, rode right over untold riches and did not see them.

Now the real treasure this great explorer missed 400 years ago has been found. We see it being won from the earth he passed over in the form of oil, coal, and copper. We see it in

strong New Mexico cattle. We see it in the shrines of Inscription Rock, Old Mesillo, the White Sands, the Carlsbad Caverns . . . in the pines, and the wealth of mineral deposits our state holds.

And it is you, the younger citizens of New Mexico, to whom the riches that Coronado sought must now be trusted.

Speaking as one of New Mexico's leading industries, we've found it a truly wonderful land. We hope you will, too.

"BLUE DEMON" is the
DRILLER'S FRIEND
in Minerals Exploration
P. O. Box 7366, Houston 8, Texas

Exploration for minerals is of greater importance today than ever before, due to ever increasing need for the utilization of our natural resources.

Rugged "Blue Demon" Bits, popular for years with the oil exploration industry, are proving their advantage as an efficient, low-cost tool for minerals exploration in even some hard rock regions.

Replaceable blades, with non-shattering tungsten carbide facing, provide faster drilling, fewer round trips and drastically reduced bit costs.

Drillers on 900 drills the world over are drilling faster, with fewer bit changes, at reduced drilling cost, with long lasting Hawthorne "Blue Demon" Bits.
