Porphyry

Porphyry is a rock with a fine-grained igneous base containing many distinct crystals.

In the same way, members of the Graduating Class of 1998 are like distinct crystals embedded in the medium of their New Mexico Tech experiences and education. While each individual is unique, all of us, as a group, share the same common basis of memories.

Porphyry has been the name of New Mexico Tech's yearbook from its first publication in 1925 until its last publication in 1981. In order that the memories of a generation of New Mexico Tech students may not be lost, this year—1998—the Student Association and Alumni Office combined forces to produce Porphyry Lite, a brief, but we hope, meaningful, yearbook.

Will this be the last Porphyry for another 16 years? We hope not.
